Internship Experience

Full Stack Java Developer Intern

EazyByts Web Solutions – Remote | June 2025 – July 2025

- Completed a one-month internship focused on full-stack Java development, applying backend and frontend technologies to build scalable applications.
- Developed and deployed three full-stack projects: Real-Time Chat Application, Stock Trading Simulation System, and News Aggregator Website.
- Utilized technologies such as Java, Spring Boot, Hibernate, MySQL, HTML5, CSS3, JavaScript, and tools like GitHub, and VS Code.
- Gained hands-on experience in RESTful API development, frontend-backend integration, and full project deployment workflows.
- Integrated third-party APIs such as RSS feeds and real-time stock data providers.

Technical Skills

- **Programming languages:** Java, Python, JavaScript
- **Relational databases:** MySQL, MySQL Workbench
- **Web Technologies:** HTML, CSS, JSP, Java Servlets, RESTful APIs, React.js
- **Cloud/DevOps:** Azure Fundamentals, AWS, Containers, Docker, Linux
- **Frameworks/Tools:** JDBC, Hibernate, Spring Boot, GitHub, Eclipse, MS Excel, VS Code
- **Soft Skills:** Self Awareness, Problem-Solving, Adaptability, Time Management

Projects

News Aggregator Website

Technologies: Java, Spring Boot, Hibernate, MySQL, HTML, CSS, JavaScript, RSS/News APIs

- Developed a web platform to fetch and display news articles from multiple sources using RSS feeds and external news APIs.
- Built backend services with Java and Spring Boot to manage data retrieval, filtering, and storage.
- Designed a responsive and user-friendly frontend using HTML5, CSS3, and JavaScript.
- Implemented features such as category-based filtering, personalized news feeds, and search functionality.
- Used MySQL to store and index news articles, and optimized queries for fast content loading.

Stock Trading Simulation System

Technologies: Java, Spring Boot, Hibernate, MySQL, HTML, CSS, JavaScript, Stock APIs

- Created a realistic stock trading simulator that allows users to practice trading strategies and manage portfolios without financial risk.
- Built backend services to track user trades, portfolio performance, and simulate market behavior.
- Integrated external stock data APIs for real-time market updates.
- Designed an interactive and responsive frontend using HTML5, CSS3, and JavaScript.
- Optimized database queries and logic to ensure smooth and scalable performance.
